Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Goedde et al. [US 5,736,915]

Goedde et al. discloses a self-cooled gas insulation transformer [10] comprising:

- an iron core and coil assembly [figure 5];
- a transformer tank [12] enclosing the core and coil assembly; and
- a cooling inert gas filled the tank.

Goedde et al. inherently discloses the inert gas having a global warming coefficient rated 1 or below and a molecular weight less than 146.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 7/5, 8/5 and 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goedde et al. in view of Ikema [JP 09-7843].

Goedde et al. discloses the instant claimed invention except for the specific material use for the core.

Ikema discloses a transformer core [2] formed of amorphous magnetic alloy material disposed in a transformer tank [4] filled with cooling medium.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use amorphous or the core of Goedde et al., as suggested by Ikema, for the purpose of improving performance.

Regarding claims 7/5, 8/5 and 10, the specific pressure used would have been an obvious design consideration based upon the intended application and operating environment.

Claims 7/1-4, 7/6, 8/1-4 and 8/6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goedde et al.

Goedde et al. discloses the instant claimed invention except for the specific pressure for the inert gas.

The specific pressure used would have been an obvious design consideration based upon the intended application and operating environment.
